## QuickCubes

QuickCubes provides easy-to-use, pre-built SQL Analysis Services cubes that deliver analysis-ready data. Access data from the General Ledger, Accounts Payable, Accounts Receivable, Inventory and Sales.

### Who can use QuickCubes?

QuickCubes can help organizations using any version of Microsoft Dynamics GP. QuickCubes is perfect for those that want to take advantage of the benefits of cubes but do not have the time, resources, or expertise to build them. Once the data is loaded into QuickCubes, business users can begin analyzing the data immediately using Microsoft Excel or any other reporting software.

### Data Integrity

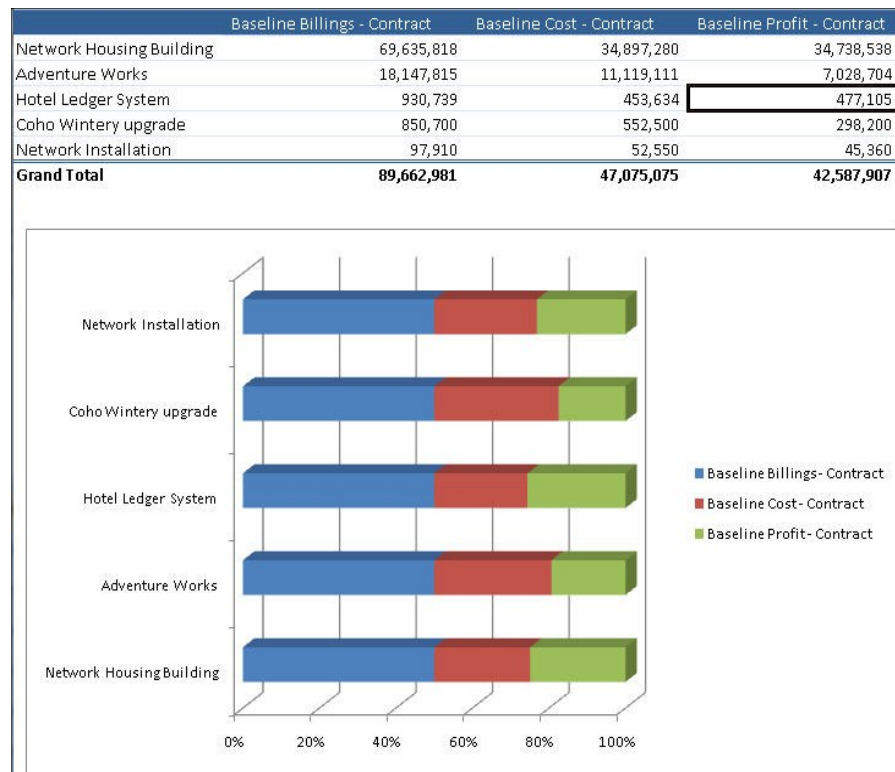

In addition to extracting information from Microsoft Dynamics GP, data from other sources can be loaded into the data warehouse. The data in QuickCubes is refreshed on a schedule that suits your business requirements.

## Project Accounting Cubes

The Project Accounting cube for Microsoft Dynamics GP delivers the information contained with Project Accounting; accessible in an easy-to-use, drag and drop environment.

All of the information contained within Project Accounting is available for analytical purposes:

- Customers, contracts, projects and cost categories
- Time and expense data, by employee and manager
- Purchase order and payables
- Actual budget and forecast
- Time periods
- Revenue, expense and gross margin data
- Custom windows and tracking

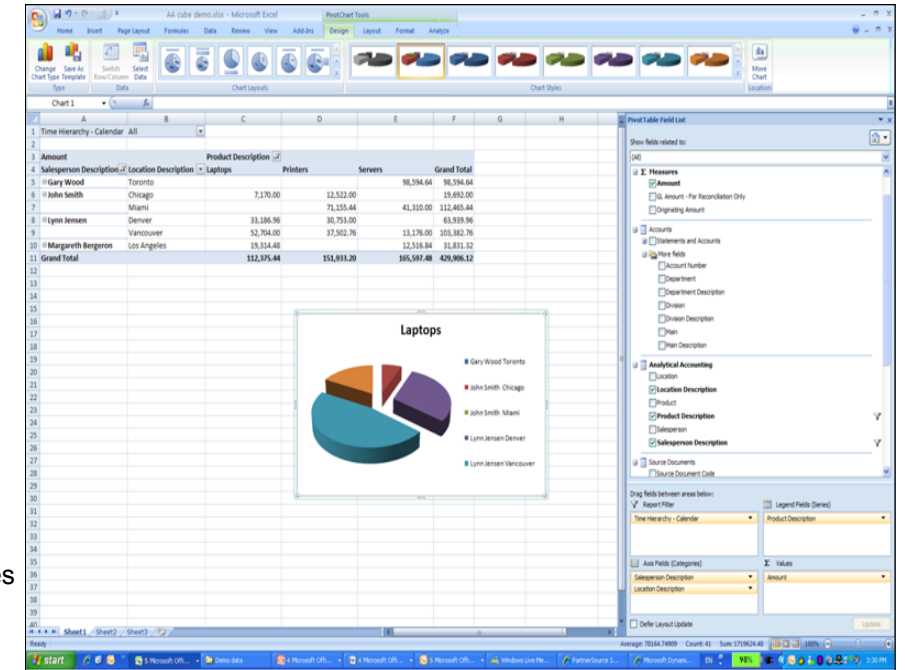

## AA Cubes

Built using SQL Analysis Services, the AA GL Cube allows the business user to carry out detailed reporting and analytics on the data contained within Analytical Accounting.

AA Cubes:

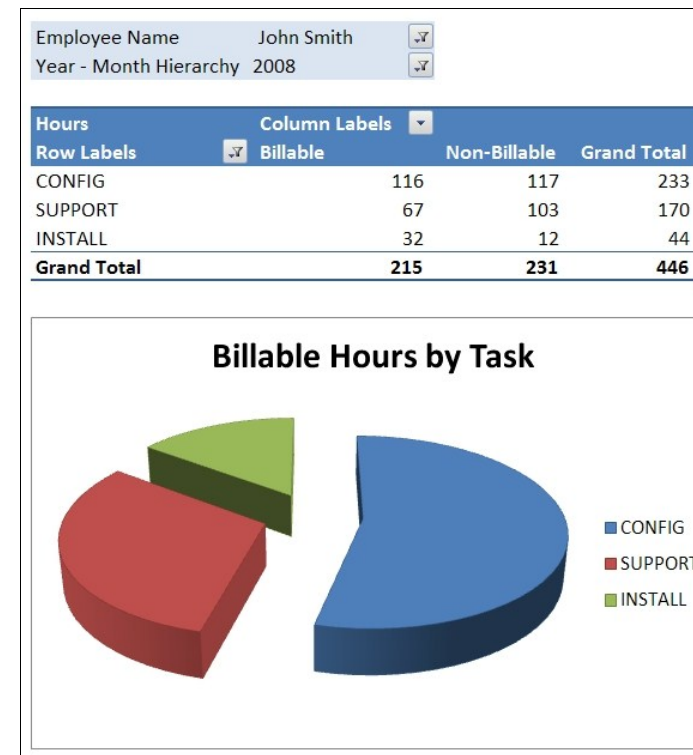

- Dimensions include GL segments and AA dimensions
- Provides dynamic access to the most recent financial transactions
- Provides greater flexibility in analyzing financial data using familiar tools like Excel pivot tables

AA Cubes is one of the utilities in CRG AA Tools. CRG AA Tools consists of a series of modules that will allow you to maximize your investment in Microsoft Dynamics GP and Analytical Accounting.

## Project Cost Cubes

There is a wealth of information contained in Project Cost by Olympic Systems: information that can be used to plan and increase productivity. Project Cost Cubes gives the business user the ability to complete detailed analytics, drilling down to the transaction level.

Project Cost Cubes provide users of Project Cost by Olympic Systems the ability to conduct detailed reporting and analytics on the many different fields and dimensions contained within the application:

- Employee
- Time period
- Project
- Task
- Customer

*All CRG Cubes are all built using SQL Analysis Services and work with Microsoft Excel and other popular business intelligence tools.*
