

## Changer

### Change and Merge Microsoft Dynamics GP Data

## Changer

- Manage your business system data at optimum efficiency
- Take control of your user-defined codes
- Ensure your Microsoft Dynamics GP business data evolves with organizational growth and restructuring

#### Modify and Consolidate Data

Developed to meet the needs of Microsoft Dynamics GP customers, Changer efficiently enables the modification and consolidation of Microsoft Dynamics GP data. Changer easily changes and merges general ledger accounts, vendor IDs, employee IDs, item numbers, customer IDs, project numbers and contract numbers for all current and historical transactions.

Transactions associated with all codes are automatically transferred to the new numbers and IDs with no trace to the original information. Drill downs, balances and reports will treat the modified information as if it had been posted to the new account from the beginning.

#### Dynamic Functionality

The distinctive changing and merging functionality of Changer allows for the adjustment to the following Microsoft Dynamics GP modules, including all associated data, information and transactions:

##### ***General Ledger (GL)***

Change or consolidate general ledger account numbers. With Changer, you can choose to transfer the transactions of one account to another *after* a specific date.

##### ***Receivables Management (RM)***

Change customer identification numbers to an existing or new customer ID.

##### ***Payables Management (PM)***

Change vendor identification numbers to an existing or new vendor ID.

##### ***Inventory (IV)***

Change and merge item numbers.

##### ***Payroll (PR)***

Change employee IDs.

##### ***Project Accounting (PA)***

Change project numbers and contract numbers.

Changer can also update data from other Microsoft Dynamics modules and various third-party applications.
