## About Corporate Renaissance Group

Corporate Renaissance Group (CRG) has been providing innovative business solutions for more than 20 years. As a member of the Microsoft Partner Network, we apply Microsoft technologies to help companies increase efficiency and to improve financial and operational performance. We offer more than Microsoft expertise; we provide thought leadership and experience.

We are a truly global company, headquartered in Ottawa, Canada, with offices in Canada (St. Andrew's NB, Toronto ON, and Kelowna BC), South Africa (Cape Town, Port Elizabeth), India (Pune) and the United States (Broken Arrow OK). We have strategic relationships in the Caribbean, U.K. and Europe.

Corporate Renaissance Group

Ottawa | Toronto | St. Andrew's | Kelowna

United States | India | South Africa

At Corporate Renaissance Group (CRG), our team and products provide proven, real world answers to your key challenges. Our experience is both broad and deep; our products are world class.

We have one goal: to improve enterprise performance. We bring a unique set of skills and methodologies and a metrics driven approach to performance.

We go beyond writing extravagant reports and PowerPoint presentations — we are recognized as solution experts.

From strategy to execution, we design and implement complete business solutions. We create and model enterprise-level dashboards, business intelligence solutions; costing and profitability solutions and employee

performance management solutions. We use Microsoft technology and our own software applications — FlexABM, Cost Allocator, CRG emPerform, Changer, etc. — to help you improve performance.

Our services and products are connected by a common goal, improving performance, your performance. We have been doing this for the past twenty years for clients around the world with offices in Canada, the United States, South Africa, India and associates in the Caribbean, the United Kingdom and Europe. We thank the 4,000+ customers who use our solutions to improve their performance.

## Strategy, Shareholder Value and Executive Compensation

Our approach to strategy design is fundamental in our role and effectiveness as a facilitator and coach. Our entire focus is identifying and executing specific actions that are sustainable in the increasingly competitive market place. We help you refine your uniqueness, your raison d'être, and with our "workbook", we facilitate the development of business and action plans.

Our value-based executive compensation framework improves shareholder value and aligns business practices and management actions in a manner that is consistent with the vision, mission and values of the enterprise.

## Cost and Profitability Analytics and Shared Services

Performance improvements can only happen with reliable and deep insights into the cost base, processes and corresponding profitability, insight that must extend beyond the general ledger to products, services and clients. With our innovative and recognized storyboarding approach, we help determine the true costs and profitability of products, services and clients. We use two world-class tools to achieve this goal: a full activity-based costing solution, **FlexABM**, and a multi-level cost allocation solution, **Cost Allocator**.

We possess the experience and expertise to help you assess, design, implement and operate your Shared Services organization. Our **Shared Services Manager (SSM)** provides a complete solution for managing shared services architecture. We have built vertical market solutions that span banking, insurance, manufacturing, distribution, service and public sector.

## Business Intelligence and Enterprise Dashboards

High performing enterprises require superior information; however, many organizations can best be described as "data rich and information poor." Extensive investments in complex enterprise resource planning (ERP) systems have not resulted in getting the information and knowledge to decision makers in a cost effective and visual manner without relying on IT specialists and analysts.

We have been building and deploying business intelligence solutions for the last fifteen years. Our team delivers cost effective business intelligence solutions that provide senior management teams across all functions their own performance dashboard to take fact based decisions.

## Employee Relationship Management (ERM)

It is well accepted that Enterprise Performance is driven by employees—their capabilities and their passion. **CRG emPerform** is an online multi-lingual employee management solution that seamlessly manages all components of ERM. emPerform offers web-based appraisals, goal management, 360 multi-rater reviews, talent management, succession planning, compensation management, employee surveys, and reporting.

## Microsoft Technology to Improve Performance

Improving performance requires a world class technology platform. We rely on the entire spectrum of Microsoft technologies and business solutions. We are a member of the Microsoft Partner Network with specialized competencies that validate our capabilities and expertise. We belong to the President's Club and Canadian Excellence programs from Microsoft.

We provide end-to-end solutions to our clients using this cost effective platform. Our experience is deep and wide: we design, implement and support Microsoft Dynamics GP (formerly Great Plains) enterprise resource planning (ERP) solutions and Microsoft Dynamics CRM, a configurable platform for managing relationships not only with customers but with all stakeholders.

We bring Microsoft Office SharePoint and Performance-Point Services to our clients to improve business insight; manage content, processes and workflows; simplify internal and external collaboration while using a single platform for Intranet, Internet and Extranet applications and build enterprise dashboards and business intelligence solutions across the entire enterprise.

We provide an end-to-end solution: from creating the appropriate architecture to meet your present and future needs, to creating data warehouse and multidimensional cubes, reports and dashboards, to hosting the entire solution.

## CRG Solutions for Microsoft Dynamics GP

We have a world class development team which has developed a number of solutions designed to help organizations like yours operate more efficiently and increase productivity. Our suite of solutions for Microsoft Dynamics GP helps companies maximize their investment and business data.

**Changer:** Change and merge Microsoft Dynamics GP data.

**AA Tools:** Backfill AA data, change AA codes, convert GL segments to AA Dimensions.

**Re-Formatter:** Modify the account framework and format of Microsoft Dynamics GP data.

**Reverser:** Reverse, rectify and re-post Microsoft Dynamics GP journal entries all at once.

**QuickCubes:** A set of Analysis Services cubes on Microsoft Dynamics GP Sales, Financial, Payables and Inventory data.
