

FlexABM

The Complete Activity-Based Costing/Management Solution

FlexABM's unique ability to perform full reciprocal costing, advanced data modeling, and dynamic reporting makes it the complete ABC/M solution

Why FlexABM?

FlexABM™ is a proven, easy-to-use, enterprise-wide ABC/M solution that identifies the true cost of all activities and provides decision-makers with the analytical tools, models, methodologies to effectively evaluate business processes.

With a low cost of ownership and effortless implementation, FlexABM provides the quickest possible return on your ABC/M investment.

Flexible and Scalable

FlexABM provides intuitive costing of activities and processes, and is ideally suited to any sized enterprise or industry segment - large or small, financial or non-financial, private or public sector. By utilizing a familiar 'drag and drop' tree structure, grouping and tagging, and roll up functionality, data modeling is uncomplicated, yet extremely advanced.

- Unlimited modeling elements
- Group and tag activities with multiple roll-ups
- Multi-level activity assignments and cost objects
- Automatic attributions and activity driver weighting
- Detailed models that accurately express expenditures and use of resources across an organization
- Models that incorporate revenue and profitability
- Multi-dimensional reporting with any combination of products, customers, or other dimensions
- What-if Scenarios

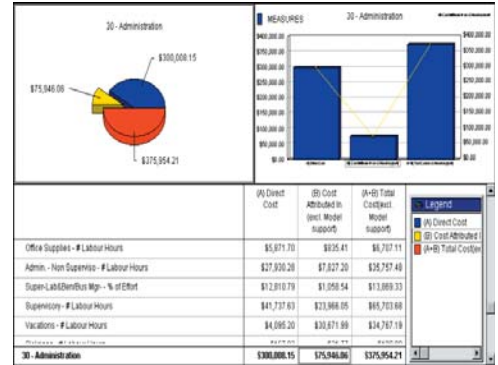

Robust Reporting

FlexABM provides the ultimate in data analysis by seamlessly integrating Cognos PowerPlay for dynamic presentation and reporting. PowerPlay gives users access to critical data to better understand business performance and facilitate superior decision making.

Analyze any number of performance measures, such as direct and indirect activity costs, and product and client profitability with ease by utilizing the powerful multi-dimensional data analysis OLAP data cubes generated by FlexABM.

FlexABM

- Standard reports, including activity dictionary and modeling structure
- Numerous graphical representations with multi-dimensional drill down reporting
- 'Print preview' and 'save' to multiple formats, including Excel and HTML

With the import wizards, FlexABM makes it easy to import financial and operational data from a wide variety of data sources.

Import and Integrate with Ease

With one of the most sophisticated, yet straightforward, 'import wizards' in the ABC/M world, FlexABM effortlessly allows you to import the financial and operational data that is so vital to the rapid and cost-effective implementation of any ABC/M system.

- Automatic data validation
- Integrate view/cost/quality/cycle time
- Incorporate costs as well as performance measures
- Populate models with data from a variety of existing operational sources, such as ERP systems

Based on Expertise

FlexABM is the result of CRG's years of extensive experience in implementing ABC/M systems for enterprises of all sizes, in all industries and sectors.
