*Transforming data into information*

## QuickCubes

- Pre-built Analysis Services cubes
- Quick and easy analytics using Microsoft Excel
- Affordable
- Decision-ready information

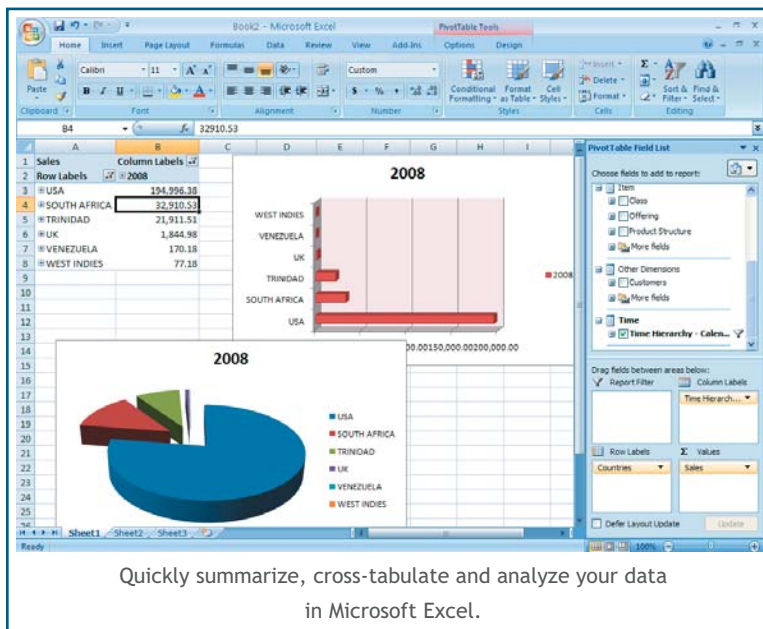

In order to make informed, strategic decisions, you need accurate business information: the data that is contained in Microsoft Dynamics™ GP.

There is an easy way to transform operational data into valuable decision-making information...QuickCubes®.

### Why QuickCubes?

The development of a cube consists of three distinct, yet important steps: extract, transfer, and load also known as ETL. This process can be demanding, difficult, and time consuming. Organizations may not have the time, resources, or expertise to build or configure cubes.

QuickCubes provides easy-to-use, pre-built analysis services cubes that deliver analysis-ready data. Access data from the General Ledger, Accounts Payable, Accounts Receivable, Inventory and Sales. Explore, examine, and analyze data with Microsoft Office Excel®.

Quickly summarize, cross-tabulate and analyze your data in Microsoft Excel.

QuickCubes can be customized to meet your company's unique requirements.

## Who can use QuickCubes?

QuickCubes can help any organization, using any version of Microsoft Dynamics GP, to take advantage of the benefits of cubes but does not have the time, resources, or expertise to build them. Once the data is loaded into QuickCubes, you can begin analyzing the data immediately using Microsoft Excel or any other reporting software.

## Data Integrity

In addition to extracting information from Microsoft Dynamics GP, data from other sources can be loaded into the data warehouse. The data used in QuickCubes is refreshed on a regular schedule.

*QuickCubes consists of a Data Warehouse and cubes for:*

- *General Ledger*
- *Accounts Payable*
- *Accounts Receivable*
- *Inventory*
- *Sales*

Making decisions just got easier as everyone has access to the same information.
