

Re-Formatter

Re-format the Account Framework

Modify Account Format

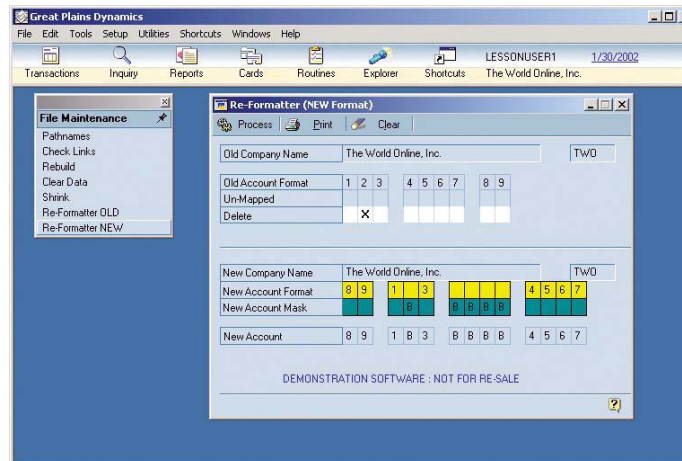

Developed to meet the needs of Microsoft Dynamics™ GP customers, Re-Formatter™ modifies the account framework and format of Microsoft Dynamics GP data. Users can change the only decision that their Microsoft Dynamics GP business management system required them to make during implementation.

Has your organization outgrown its Chart of Accounts?

Has your account structure become obsolete or inadequate?

Is collecting accurate data a nightmare because your accounts are not set up correctly?

Does modifying, expanding or growing your Chart of Accounts seem like an impossible task?

The Re-Formatter screen clearly shows both the old and new account format information for easy reference.

Re-Formatter seamlessly reformats the Chart of Accounts and Account Structure, instantaneously altering the format of all data.

Re-Formatter can change

- Maximum account length
- Segment size
- Number of segments
- Sorting options

With Re-Formatter, all historical data is modified as the old account format is mapped to the new account format.

Re-Formatter

Fast and Effective

With a few simple steps, Microsoft Dynamics GP users can transform their “old” data format into a “new” and improved account structure.

Additional Microsoft Dynamics GP Modules*

Corporate Renaissance Group (CRG) understands that many customers have implemented third party solutions to enhance the value and increase the return of their Microsoft Dynamics GP investment. Re-Formatter can update data from various third party applications and additional modules.

*On Microsoft Dynamics for MS SQL Server and MSDE platform only.
